

You probably have never heard of us – but we’re sure you’ve listened through us.

StreamUnlimited is a main player in the field of **Chromecast built-in™**, **Google Voice Assistant**, **Amazon Alexa**, **Apple AirPlay2** and top-notch audio technology.

We are building the technology behind the **worlds most renowned brands** in smart speakers, hi-fi music equipment and music streaming apps.

It’s very likely that you have a product at home driven by **software developed by us**.

So, since you’re already familiar with us – maybe you’d like to pay us a visit too. And even stay. Because you might find our company a **great place to work**.

Some of our benefits:

- **Night owl or early bird** – choose your best work time
- **Travel the world** if you want to: Our engineers are regularly visiting our customers around the globe
- Work with and learn from **top engineers of top brands** (we are not allowed to disclose most of our customers – but rest assured: you know them)
- Tired of working on lame workstations? **Choose the software tools** you want to work with – we are as flexible as you are

You will fit right in if:

- You have **great skills in C/C++** (11,14)
- You like a **result-oriented culture**
- Working with **embedded systems** is your passion
- You have experience in working with **Qt, Yocto** and **embedded Linux**

Sounds great?
