

StreamUnlimited develops software and electronics for **audio streaming, voice assistant devices, wireless smart speakers** and is the global leader in this field. Our solutions are used by Premium Audio Brands, as well as manufacturers of Smart Home products. StreamUnlimited is a main player in the field of **Google Cast™, Google Voice Assistant** and **Amazon Alexa**. Headquartered in Vienna/Austria we operate offices in Bratislava, China and the Silicon Valley.

We are looking for

Senior HW Development Engineer (m/f)

Your responsibilities

- development of embedded modules combining latest SoCs (multicore ARM) with wired and wireless network interfaces
- verification and release (wireless frontend performance, EMC, signal integrity, pre-compliance)
- support industrialization in far east
- support our customers in design of mainstream and premium audio products; design-in support in co-operation with local and remote FAEs

Your profile

- higher technical education in the field of electrical engineering
- solid experience in electronics design, knowledge of high-frequency/wireless technologies and EMC
- knowledge of audio technology (ADC, DAC, GND concepts, audio quality assessment)
- fluent in English
- some experience in project management
- basic skills in software development on embedded systems (linux)
- willing to travel abroad (few weeks per year)

Your personal strengths

- self-motivated, flexible and self-responsible
- interest in new technologies and products
- team oriented
- structural and systematic way of working

What we offer

- Growing company with various career possibilities
- Team-oriented and informal work environment
- Challenging projects
- Collaboration with the world's leading technology companies (incl. trips to Asia and USA)
- Vienna office is 7 minutes from U6 and 4 minutes from Badner Bahn, sufficient parking lots
- Subsidized cafeteria, flexible working hours.

For these positions we offer an annual salary of at least EUR 49.000 and performance-related bonus payments.
