

StreamConApp

Control App for Streaming Clients

Description

Smart Phone and Tablet apps to control streaming audio devices are a must have addition today. Perfectly matched apps for iOS and Android are available for all our streaming solutions.

The standard feature app can either only be branded or further customized and extended by StreamUnlimited.

Full control over the user interface and integration into existing apps are offered through licensing the control API library.

Offering - Standard App

- Features: playback control of all available sources, search in browse views, play queue, meta data and file property display
- Branding: customer specific start up screen, color schemes and backgrounds, app name
- App publishing support (App store, market place)
- Maintenance during app life cycle for defined iOS versions and Android HW platforms
- Multi-room control for Stream800 based products

Offering - Customized App & App library

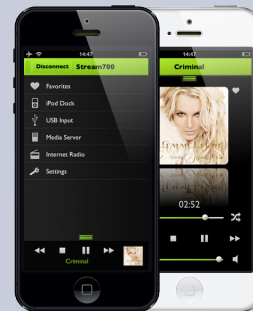

- Adding customer specific controls or features like W-LAN set-up
- User interface modifications
- Control API library (CAPI) for 3rd party design of UI or integration in another app framework

Advantages

- One-stop-shop: from concept up to product quality and all essential electronic components of a product including app
- Lower risks / best interoperability between app and consumer device
- Lower complexity for customer
- Reduced time-to-market

Related Products and Services

- Stream700 - High End Audio Streaming Client
- Stream800 - Multi Room Audio Streaming Module
- Online services for consumer products
- Concept and design consultancy
- Software & Hardware development
