

StreamUnlimited

Your first choice for **Microchip** based products featuring **Apple AirPlay**

Experience

No other design house has more experience on the Microchip (formerly BridgeCo/SMSC) DM8x platform than StreamUnlimited. We started to work with and for BridgeCo in 2005 and have built up more than 100 man-years of experience on this specific platform, both in software and hardware development.

StreamUnlimited developed numerous DM8x based products, like the first OSD iPod dock (Griffin's TuneCentre), the first digital dock (Denon's ASD51W/N) and a variety of AirPlay enabled products.

StreamUnlimited also has huge experience on the underlying software of Microchip's JukeBlox software stack like no other. This is useful if you want differentiating brand specific features and functions to be integrated, not just UI customizations.

Furthermore, we have a whole set of High End add-on features available for your product, which are not present in the standard stack.

...is now part of

Independent

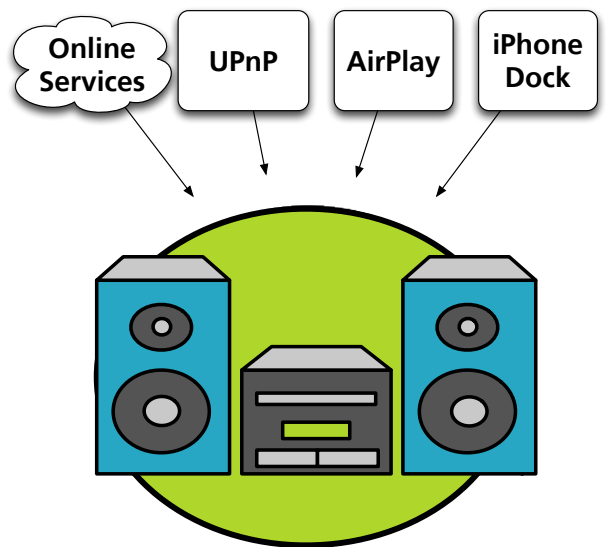

With StreamUnlimited you are not limited to one manufacturer. We have several good industrial partners in Asia, and can also work with your subcontractor of choice. Almost every month engineers of StreamUnlimited are in Asia for the ramp up of a product. Further, you own the code of your specific applications.

The whole chain

Depending on your needs we can offer the whole chain or parts of it: product specification, architecture, hardware development, software development, EMC, test, release, industrialization.

Applications

- Embedded digital audio player - add a streaming module to your existing product design
- Stand alone digital audio player with or without graphical UI
- All-in-one AirPlay speaker and Dock

About StreamUnlimited

StreamUnlimited is an integrated embedded engineering house focusing on innovative and quality products. We have high level competences in Connectivity and User Interface Technology, powered by a strong background in Audio and Video. We provide development and integration services to our customers. StreamUnlimited also offers a range of fully featured products, such as the DM8x based Stream700.
