

Overview

Airable.api from TuneIn Media connects hardware and companion apps to multiple online sources of content, including music subscription services, airable radio station and podcast catalogue.

Fully integrated into StreamSDK, airable.api offers the ability to implement one API instead of MANY, which reduces the time, effort and cost of implementing and maintaining each service natively and usually takes just a few weeks to implement, depending on the hardware platform and the UI definition.

Why you should choose airable.api?

- ▶ Reduce time to market by integrating one API
- ▶ Ready for all device form factors
- ▶ 6 million+ devices with airable Services installed and in use.
- ▶ Consumers experience aggregated navigation and control of multiple online services through a single App.
- ▶ Add media catalogues and music services without updating devices.
- ▶ Updates for media catalogues and music services usually don't require software updates.
- ▶ Technical and administration issues are handled by airable.
- ▶ Testing and Certification is handled by airable, and certification partner, Sound Certificate GmbH.

StreamUnlimited, founded in 2005, is a supplier of software solutions and hardware modules for connected audio and IoT products, with over 120 employees at office locations in Vienna, Bratislava, Shenzhen, Osaka and San Francisco. As the de facto global system integrator offering its own IP and engineering services, StreamUnlimited development partnerships include all major semiconductor companies and technology providers in the consumer electronics and IoT channel. StreamUnlimited works with a global cross-section of high-end audio, CEDIA-channel, premium and mainstream consumer electronics and smart home manufacturers.
