Overview

airable.api from TuneIn Media connects hardware and companion apps to multiple online content sources, including music subscription services, airable radio stations, and podcast catalogs.

Fully integrated into StreamSDK, airable.api enables implementation of a single API instead of many, significantly reducing the time, effort, and cost of integrating and maintaining each service individually. Integration typically takes just a few weeks, depending on the hardware platform and UI definition.

Why choose airable.api?

▸ Reduce time to market by integrating a single API

▸ Compatible with all device form factors

▸ 6 million+ devices have airable Services installed and in use

▸ Consumers benefit from unified navigation and control of multiple online services through a single app

▸ Add media catalogs and music services without requiring device updates

▸ Media catalog and service updates typically don't require software updates

▸ Technical and administrative management is handled by airable

▸ Testing and certification are managed by airable and its certification partner, Sound Certificate GmbH

StreamUnlimited, founded in 2005, is a supplier of software solutions and hardware modules for connected audio and IoT products, with over 120 employees at office locations in Vienna, Bratislava, Shenzhen, Osaka and San Francisco. As the de facto global system integrator offering its own IP and engineering services, StreamUnlimited development partnerships include all major semiconductor companies and technology providers in the consumer electronics and IoT channel. StreamUnlimited works with a global cross-section of high-end audio, CEDIA-channel, premium and mainstream consumer electronics and smart home manufacturers.
