

StreamSDK is a **flexible, modular software solution** enabling **streaming audio, IoT, and voice assistant** functionality for consumer electronics devices. It is portable across multiple silicon platforms and complements the StreamUnlimited ready-to-use hardware module family.

Example Product Segments

- ▶ Immersive audio products for speakers and soundbars
- ▶ High-end audio music players, AVRs, and loudspeakers
- ▶ Smart Home & IoT devices
- ▶ Tabletop radios with DAB+ and FM
- ▶ "Works with" connected product ecosystems
- ▶ Headphones

- Software provided by StreamUnlimited
- Software customizable by partner or customer
- 3rd-party software components

StreamUnlimited, founded in 2005, is a supplier of software solutions and hardware modules for connected audio and IoT products, with over 120 employees at office locations in Vienna, Bratislava, Shenzhen, Osaka and San Francisco. As the de facto global system integrator offering its own IP and engineering services, StreamUnlimited development partnerships include all major semiconductor companies and technology providers in the consumer electronics and IoT channel. StreamUnlimited works with a global cross-section of high-end audio, CEDIA-channel, premium and mainstream consumer electronics and smart home manufacturers.
