StreamUnlimited

Years of Connectivity for Things

StreamUnlimited helps customers integrate wireless and wired network technologies to create connected products. Our expertise — built over two decades of wireless development — is available to support your project.

As an embedded systems design-house and producer of a range of embedded hardware modules we are experienced in all aspects, including

- ▸ **Hardware development** (RF frontend development and optimization)
- ▸ **Software development** (Linux drivers, middleware, application, RTOS)
- ▸ **EMC compliance and pre-compliance testing** (e.g. RED, FCC, IC)
- ▸ **Certifications and listings** (Wi-Fi, Bluetooth)
- ▸ **Embedded antenna integration** (selection, integration, verification)
- ▸ **Automated test equipment development** for RF calibration and verification
- ▸ **Interoperability testing and product release**
- ▸ **RF performance testing** in anechoic chambers
- ▸ **Industrialization support** in Eastern Europe and Asia

The wireless eco-system of StreamUnlimited

StreamUnlimited, founded in 2005, is a supplier of software solutions and hardware modules for connected audio and IoT products, with over 120 employees at office locations in Vienna, Bratislava, Shenzhen, Osaka and San Francisco. As the de facto global system integrator offering its own IP and engineering services, StreamUnlimited development partnerships include all major semiconductor companies and technology providers in the consumer electronics and IoT channel. StreamUnlimited works with a global cross-section of high-end audio, CEDIA-channel, premium and mainstream consumer electronics and smart home manufacturers.
